

Dense Phase: Pressure Fly Ash Transport

Dense Phase Technology utilizing the CLYDE Bergemann Spheri Valve

- High availability and long operating life
- >1,000,000 cycles between seal replacement
- Low maintenance
- Simple, proven design: > 40,000 in operation
- Full bore unobstructed material flow
- Cuts through moving or static material columns
- Forms pressure tight seal when closed
- Pressures up to 430 Psi
- Wide range of valve sizes: 2" to 20"
- Temperatures up to 840°F

SPHERI VALVE
